I am an apprentice in Data Engineering with a clear ambition to work with experts in the field and related. Currently, I am a student, pursuing a Bachelor's Degree in Data Science and analytics. What makes me have an added advantage is my exceptional prowess in quick learning. I look forward to working and shown through the big world of data science.

---

## Experience

### Machine Learning and Computer Vision Support Engineer

Global Technology Solutions, Remote

Mar 2023 - Apr 2023

I worked with a team on machine learning and computer vision projects. My primary role was filtering and delivery of images best suited for the models
